### **Nebraska Video Provider Goes with Innovative Systems IPTV Encryption**

**Hartington, NE** – Citing a need to consolidate more video applications on a single source to save on operational costs, Hartington Nebraska based television provider Hartelco has added the InnoCryption™ to their InnoStream™ Video Server platform. According to Bill McGregor, Plant and Network Manager, switching to the Innovative Systems InnoCryption™ became a viable option when they had a server failure with their previous Encryption service.

McGregor added that the long-standing relationship with Innovative Systems and their IPTV Middleware made it very attractive because all the service management could still be done from the same Graphical User Interface (GUI).

What McGregor likes about the InnoCryption™ service is fewer interfaces to the core router which allows for an easier maintenance path to troubleshoot any encrypted channels.

Once the InnoStream™ hardware is in place and running, the InnoCryption™ flows right through to the Innovative Systems Middleware management, streamlining set up times for encrypting channels. He says that InnoCryption™ is very similar to Innovatives other video products, simple and intuitive.

#### **About Hartelco**

Hartelco started as Cedar County Farmer's Telephone Company in 1905. Hartelco has delivered fiber to 100% of their customers. In 2012 Hartelco made a significant upgrade to an IPTV system which brings many more entertainment services to their customers. All home football and basketball games for both of their local high schools are carried "live" on Hartelco TV. Hartelco also offers phone service and Internet with download speeds up to 100 Mbps.

#### **About Innovative Systems**

For many years, Innovative Systems has been a leading provider of solutions for the North American Communications market with nearly 1200 systems deployed. eLation™, our OSS solution, includes integrated billing, financials, automated provisioning, ACS, and Staking and Mapping. The InnoStream™ server is our one-platform approach to IPTV solutions such as Middleware, VOD, Cloud DVR, Restart TV, HLS Packaging, and InnoCryption™ Conditional Access. The new IS-5112W set-top box combines WIFI access points and CEC input control to lower install and support costs. The APMAX™ hardware platform provides enhanced voice and hosted business solutions. The Innovative Systems Print Division specializes in full color printing of variable data statements and invoices for industries including telecom, utilities, and sanitation.
