FOR IMMEDIATE RELEASE

VTX1 Companies Acquires Wireless Internet Service Provider TISD, Inc.

Expansion in the Texas Gulf Coast Region, to grow the company's South Texas service area

(RAYMONDVILLE, TX – October 4, 2021) –VTX1 Companies announced today that it has acquired TISD, Inc., a wireless internet service provider headquartered in Victoria, Texas. TISD boasts a service area of over 3,000 square miles and a subscriber base of 9,900 customers. The acquisition will increase VTX1's existing subscriber count to approximately 34,000 subscribers in the South Texas Region, elevating them to become one of the largest independently-owned internet service providers in Texas.

"TISD is happy and excited to be joining the VTX1 family. We look forward to working together." noted Chief Executive Officer of TISD, Diann Cumberland.

VTX1 Companies is proud to bring TISD into their acquisition portfolio which includes other recent acquisitions in the Seguin and San Antonio areas. This acquisition will help extend their expansion from the Rio Grande Valley into an increasingly northerly footprint near the Gulf Coast.

Over the last year and a half, VTX1 recognizes the publics' increasing dependence on reliable broadband services, a phenomenon which is unlikely to disappear. VTX1's goal is to bring connectivity to as many communities as possible in both rural and urban areas, so they are able to connect the world for school, work, and play. Both VTX1 and TISD share this same passion of bringing connectivity to rural communities, in addition to the urban areas they serve, and working together they will be able to continue that expansion.

Dave Osborn, CEO of VTX1 Companies, added: "We are looking forward to adding TISD to our group of companies. Our joint vision is to continue to expand the number of people to whom we can provide exceptional broadband services. An additional advantage to uniting with TISD is it will enable both organizations to capitalize on economies of scale which neither could have achieved separately. We are looking forward to scaling even greater heights together".

About VTX1 Companies.

VTX1 Companies was established as Valley Telephone Cooperative in 1952 with the purpose of providing telephone service to rural subscribers deemed unfeasible by larger companies. The company has grown to become a leading rural broadband service provider offering fiber and wireless internet and telephone services to customers in South Texas. VTX1 Companies' service area covers approximately 44,000 square miles and is one of the largest rural internet service providers in Texas.

About TISD, Inc.

TISD, Inc. has been in business for over 26 years and are based in Victoria, Texas. They provide high-speed broadband wireless Internet service to customers across the Texas Gulf Coast area, with coverage that stretches across over 3,000 square miles. In addition to broadband services, they also provide other technology and IT services to the business community.
